Ziggy's Story

Ziggy is a friendly-looking alien who strongly resembles an Earth gecko. He has never disguised himself since arriving on Earth in 1970! He was part of Nova's crew. Since then, he has helped track the movements of the SU's core while waiting for a chance to reach it. Patiently, he works out the logic of its movements, a task that takes more than ten years. Once he succeeds, he realizes the SU will resist: it will take an army to get close. He then meets Da Silva in Brazil. Convinced that the answer must come from humans, Ziggy agrees to give him his journal. Ziggy also learns the origin of the SU's corruption. He keeps it secret, believing that revealing it would spark an unprecedented war across the universe.
